Variegated Calamondin

A fairly vigorous, highly productive tree with a rounded compact habit and small, oval leaves. The small, white flowers have a heady, delicate fragrance. The fruit is small and spherical like the common calamondin but differs in its unusual variegated leaves and fruit, which presents light green lengthwise stripes on the rind. This is a very decorative, reflowering plant with flowers and fruits almost all year round.

Category: Citrus
Families: Rutaceae
Genus: Citrus
Species: mitis (=microcarpa) "Foliis variegatis"
Geographical Area of Origin: South-East Asia
Climatic Zones: Sub-tropical, USDA 10 b (Southern Italy and islands)
Habit: Tree
Leaves: Evergreen
Colore Foglie: Variegato
Flowering Period: Febbraio / Marzo / Aprile / Maggio / Agosto / Settembre / Ottobre
Flower: Raceme
Colore Fiori: Bianco
Favorite soil: Sub-acid / medium acid / Middle-Dough / Medium soil
Water needs: Medium
Light Exposure: Medium shade / Half shade / Full light / Full sun
Form: Tree
Colore Frutti: Giallo
Parfumed: yes
