The bower vine

Pandorea jasminoides, theï bower of beautyï, bower vineï orï bower plant, is a species of woody climbingï vineï in the familyï Bignoniaceae. It is native toï New South Walesï andï Queensland,ï Australia. Growing to 8ï m (26ï ft), it has compound,ï evergreenï leaves, and in spring and summer produces trumpet-shaped flowers which are white or pale pinkï with a hairy, deep maroon throat, and fragrant. The petals may be 55mm long. It forms large pointed pods filled with papery seeds, and is easy to germinate, having two-lobedï dicotyledons. It grows in USDA zones 9 and 10. It usually does not tolerate temperatures below 5ï ï C (41ï ï F), especially when young, and must be grown in a cool greenhouse or conservatory. Plants may be placed outside during summer months.

Category: Flowering shrubs
Families: Bignoniaceae
Genus: Pandorea
Species: jasminoides
Geographical Area of Origin: Oceania
Climatic Zones: Sub-tropical, USDA 10 b (Southern Italy and islands)
Habit: Shrub-climber
Leaves: Evergreen
Colore Foglie: Verde ï Variegato
Flowering Period: Aprile / Maggio / Giugno / Luglio / Agosto / Settembre / Ottobre
Flower: Tubular
Colore Fiori: Rosa ï Viola
Favorite soil: Sub-acid / medium acid / Middle-Dough / Medium soil
Water needs: Medium
Light Exposure: Medium shade / Half shade / Full light / Full sun
Form: Wired on stick / Plant on cane / Pyramid
Colore Frutti: Marrone

Parfumed: yes
