Coastal rosemary

Westringia fruticosa, theï coastal rosemaryï orï coastal westringia, is a shrub that grows near the coast in easternï Australia.
The flowers are white, hairy and have the upper petal divided into two lobes. They also have orange-to-purply spots on their bottom half. This shrub is very tough and grows on cliffs right next to the ocean.
The plant's tolerance to a variety of soils, the neatly whorled leaves and all-year flowering make it very popular in cultivation.

Category: Outdoor foliage plants
Families: Lamiaceae
Genus: Westringia
Species: fruticosa
Geographical Area of Origin: Oceania
Climatic Zones: Sub-tropical, USDA 10 b (Southern Italy and islands)
Habit: Shrub
Leaves: Evergreen
Colore Foglie: Verde
Flowering Period: Marzo / Aprile / Maggio / Giugno / Luglio / Agosto / Settembre / Ottobre / Novembre
Flower: Tubular
Colore Fiori: Bianco
Favorite soil: Sub-acid / medium acid / Middle-Dough / Medium soil
Water needs: Medium
Light Exposure: Medium shade / Half shade / Full light / Full sun
Form: Grown as shrub / bush
