Passion flowers

Passiflora, known also as theï passion flowersï orï passion vines, is aï genusï of about 550ï speciesï o flowering plants, theï type genusï of theï familyï Passifloraceae.
They are mostlyï tendril-bearingï vines, with some beingï shrubsï orï trees. They can beï woodyï o herbaceous. Passion flowers produce regular and usually showyï flowersï with a distinctiveï corona.ï Passifloraï has a largelyï neotropicï distribution, unlike its familyï Passifloraceae, which includes moreï Old Worldï species (such as the genusï Adenia). The vast majority ofï Passifloraï are found inï Mexico,ï Centralï and South America, although there are additional representatives in theï United States,ï Southeast Asia, andï Oceania.
A number of species ofï Passifloraï are cultivated outside their natural range for both their flowers and fruit.ï

Category: Outdoor flowering plants
Families: Passifloraceae
Genus: Passiflora
Species: spp
Geographical Area of Origin: Central America / South America
Climatic Zones: Sub-tropical, USDA 10 b (Southern Italy and islands)
Habit: Shrub-climber
Leaves: Evergreen
Colore Foglie: Verde
Flowering Period: Aprile / Maggio / Giugno / Luglio / Agosto / Settembre / Ottobre
Flower: Simple flower
Colore Fiori: Blu ï Verde ï Giallo ï Rosso ï Arancione ï Bianco ï Rosa ï Viola
Favorite soil: Sub-acid / medium acid / Middle-Dough / Medium soil
Water needs: Medium
Light Exposure: Medium shade / Half shade / Full light / Full sun
Form: Espalier / Pyramid

Colore Frutti: Arancione  ï Viola 
Parfumed: yes
