The lemon "Cerza"

The lemon 'Cerza' owes its name to the small hamlet Sicilian where it was discovered in 1987. This varietyï is very productive. It forms an erect tree with deep green foliage. Its branches are devoid of thorns and the young shoots, as well as the flowers, are delicately tinged with purple. The beautiful oval fruits, bright yellow when ripe, are medium in size and can be picked from late November. Their juicy flesh is very acidic and does not contain seeds. Suffering from the cold beyond -4 ï C, its open-air cultivation is reserved for regions with a mild climate; elsewhere, it is best grown in a large, winterized, frost-free container in a greenhouse or conservatory.

Category: Citrus
Families: Rutaceae
Genus: Citrus
Species: limon "Cerza"
Geographical Area of Origin: Mediterranean Europe
Climatic Zones: Mediterranean: South and islands, hills. USDA 10 a
Habit: Tree
Leaves: Evergreen
Colore Foglie: Verde
Flowering Period: Marzo / Aprile
Flower: Raceme
Colore Fiori: Bianco
Favorite soil: Sub-acid / medium acid / Middle-Dough / Medium soil
Water needs: Medium
Light Exposure: Medium shade / Half shade / Full light / Full sun
Form: Tree
Fruiting Period: Gennaio / Febbraio / Marzo / Novembre / Dicembre
Colore Frutti: Giallo

Parfumed: yes
