The Calabrese orange

The Oval or Calabrese orange is a cultivar of unknown origin, probably generated by a mutation of the Common Blond orange.
The tree is average sized with spreading habit and remontant, with the most abundant flowering occurring in spring months. The white, very fragrant flowers grow singly. The fruit is oval with yellow-orange rind and juicy flesh with a pleasant flavour. It remains on the tree until late spring.
This cultivar is an ideal choice as an ornamental plant.

Category: Citrus
Families: Rutaceae
Genus: Citrus
Species: sinensis "Ovale Calabrese"
Geographical Area of Origin: Mediterranean Europe
Climatic Zones: Sub-tropical, USDA 10 b (Southern Italy and islands)
Habit: Tree
Leaves: Evergreen
Colore Foglie: Verde
Flowering Period: Giugno / Luglio / Agosto / Settembre / Ottobre
Flower: Simple flower
Colore Fiori: Bianco
Favorite soil: Sub-acid / medium acid / Middle-Dough / Medium soil
Water needs: Medium
Light Exposure: Medium shade / Half shade / Full light / Full sun
Form: Fitocella / Tree
Colore Frutti: Arancione
Parfumed: yes
